

# Report for Week #3

Health Focused Personal Planner

Group: 2

Date: 2/6/2025

Location: Cline Library room 240

Present participants: Dorian (Presenter), Cole (Reporter), Daniel (Manager), Travian, Jesse, James

Missing participants: None

Project repo: <https://github.com/Oracle451/Personal-Planner>

## 1. Activity Summary

Describe what each individual has contributed to the project in the last week. Provide some supporting documentation (e.g., an issue number, commit id, corresponding meeting date, etc.). If someone didn't do anything, please be honest and explain why.

**Activity that advances your project toward completion is expected every week and should be reflected in your Git repository!**

Jesse

- File management in the github, reorganized some stuff for ease of access, also refined the features list

Cole

- Split HTML file into HTML and Javascript (Commit: ....will add this later)
- Populated JS file with functions

Dorian

- Nothing, mostly thought and brought ideas but nothing quantitative

Travian

- Created color scheme and updated design

Daniel

- Designed a better layout for the days on the tracking calendar. Have them also be shaded based on the user's idea of how their performance was.

James

- Mostly just spoke about ideas on design and future plans, nothing coding or software related.

## 2. Retrospective

In your weekly meeting, you should spend a few minutes discussing how the group is functioning. What aspects of the group dynamics contribute to the success of the project? In addition, raise any issues—best done directly but with humor and kindness—that you believe are interfering with the effectiveness of the group and your ability to complete the project on time.

The project retrospective is an opportunity for the group and each individual to reflect on their experience with the project and improve the way the group works together. Make five lists:

### 1. Appreciations:

2. Successes: We have a successful basic framework for a calendar and everyone in the team is brainstorming new ideas
3. Failures: We had clashing ideas on color scheme and layout, and decided to leave this to Travian for now
4. Barriers: Difficulties setting up GitHub desktop for each team member
5. What we should try next time: Putting together all of our ideas

The retrospective should be an open and safe space for the team to reflect on and discuss what works well (and what doesn't!) so you can improve. Don't make it personal, and don't take it personally. Be open to criticism and offer constructive and polite critiques. Focus on how to improve the quality of your team and the product you are developing.

### 3. Next steps

Think about what needs to be done and assign tasks. Update your activity management system with new tasks, actual hours spent in the activities, and corresponding GitHub issues. Summarize these tasks here.

Daniel

- Work on the code for tab sections so that you can click through the various sections easily

Cole

- Create an outline for homepage features and how we could implement them

Travian

- Further update design layout w/ more features

Jesse

- Design an icon for the “streaks” feature

James

- Finalize base design for the site and start working on creating lines of code.

Dorian

- Work with javascript to make the calendar full.
