Report for Week #9

Iron Man Planner
Group: 2
Date: 3/24/2025
Location: Cline Library room 240
Present participants: Dorian (Reporter), Cole, Daniel, Travian, Jesse (Manager), James (Presenter)
Missing participants: None
Project repo: https://github.com/Oracle451/Personal-Planner

1. Activity Summary

Describe what each individual has contributed to the project in the last week. Provide some supporting documentation (e.g., an issue number, commit id, corresponding meeting date, etc.). If someone didn't do anything, please be honest and explain why. **Activity that advances your project toward completion is expected every week and should be reflected in your Git repository!**

Jesse

- No commits made to Github this week, completion of previous heavy functions gave me time to take a break from this project to focus on other work.

Cole

- Added Styling to the side bar buttons, change month buttons, and options menu buttons for a more appealing user interface
- Added toast notifications for certain important user actions like clearing cookies or changing the theme
- Commit #: 3e838c7e30c76f1871a64aa61a4be3402c0dab7b

Dorian

- Fixed text shadow around texts
- Fixed display height for workout popup
- ddabd898e228bb440e55b16763950f3a8386cd5f

Travian

- Prettified the side bar and make the buttons look nice
- (Commit: a48c23f8bac8dd0868f679aae050cd14468d51d2)

Daniel

- Made UI changes to make the "upcoming events" section more readable (commit: eb708c4e9c4731ff4dc6d8467d1d1d1187042c08)

James

- No commits made this week, finished meals sidebar functionality last week

2. Retrospective

In your weekly meeting, you should spend a few minutes discussing how the group is functioning. What aspects of the group dynamics contribute to the success of the project? In addition, raise any issues—best done directly but with humor and kindness—that you believe are interfering with the effectiveness of the group and your ability to complete the project on time.

The retrospective should be an open and safe space for the team to reflect on and discuss what works well (and what doesn't!) so you can improve. Don't make it personal, and don't take it personally. Be open to criticism and offer constructive and polite critiques. Focus on how to improve the quality of your team and the product you are developing.

1. **Appreciations:** This week we appreciate Dorian taking initiative this week and changing the font across the website to be more readable.
2. **Success:** This week we succeeded in implementing visual changes to the website that improve consistency with the users chosen theme
3. **Failures:** Certain areas of our JavaScript code could use improvement that would help with readability and efficiency
4. **Barriers:** Some of our functions are so integrated with the codebase as a whole it can be difficult to make changes without breaking something.
5. **What we should try next time:** We should try modifying the updateTheme function to use set variables for colors instead of manually setting them each time.

3. Next steps

Think about what needs to be done and assign tasks. Update your activity management system with new tasks, actual hours spent in the activities, and corresponding GitHub issues. Summarize these tasks here.

Jesse

- Previous functions I have made lack explanation, and will make it difficult to update or change later on, comments should be added.
-

Cole

- Add Styling to the buttons in sub menus
- Add functionality to the daily calorie sidebar menu and upcoming events sidebar menu

Dorian

- Add in the routines tab to work in conjunction with the workouts tab
-

Travian

- Look at issues
- Highlight current day to make it more visible

Daniel

- Add more functionality to Calorie Tracking
- Create more UI functionality

James

- Refine the UI look of the meals menu
