Report for Week #2

Health Focused Personal Planner
Group: 2
Date: 1/30/2025
Location: Cline Library
Present participants: Dorian, Cole, Daniel, Travian, Jesse, James
Missing participants: None
Project repo: [Oracle451/Personal-Planner: This is a group project for CS-386](#)

Roles:

James:

Presenter

Jesse:

Reporter

Quality assurance

Cole:

Manager

Daniel:

Manager

Travian:

Presenter

1. Activity Summary

Describe what each individual has contributed to the project in the last week. Provide some supporting documentation (e.g., an issue number, commit id, corresponding meeting date, etc.). If someone didn't do anything, please be honest and explain why.

Activity that advances your project toward completion is expected every week and should be reflected in your Git repository!

Cole

- **Made the github and pushed basic HTML and CSS files to it.**

Dorian

- **Contributed ideas for how the web page should look and what it should include.**

Jesse

- **Designed Mock up Web pages.**

Daniel

- **Designed interview questions to help test our product ideas with potential customers.**

Travian

- **Coordinated weekly meetup, communicated with the team to figure out what's needed**

2. Retrospective

1. Appreciations: Jesse really took the initiative and made a mock up of how our finished product UI should look.
2. Successes: This week we finalized our idea with a potential target audience
3. Failures: Lack of useful results from interview questions
4. Barriers: Had a hard time being conclusive on a final idea.
5. What we should try next time: Pinpoint our feature set that we are planning to implement

3. Next steps

Think about what needs to be done and assign tasks. Update your activity management system with new tasks, actual hours spent in the activities, and corresponding GitHub issues. Summarize these tasks here.

Daniel

- Design the ideas that will be implemented in our website such as a calorie counter and BMI calculator.

Jesse

- "What it'll look like" HTML and CSS code, the skeleton of a functional page on our website.

Cole

- Split the HTML file into separate HTML and JavaScript files
- Add JavaScript functions to support potential features

Travian

- Finalize the color theme

Dorian

- Make BMI Calculator and add formula to calculate BMI and ideal calorie intake
